PRESIDIO®

AWS & DevOps Workshop

Presidio's DevOps Platform Workshop helps organizations better understand options to enhance their Infrastructure as Code / Platform deployment strategy and methodology.

Presidio will collaborate with client resources to review the current state of the AWS environment, usage, and/or areas for services and improvements.

Activities consist of discovery and review sessions, analysis and assessment activities including current DevOps maturity.

Who Should Participate

Presidio's Platform DevOps team facilitates the workshop where direct customer participation is vital and expected.

Recommended Customer Attendees:

- Customer SMEs including Operations / Dev Owners and IT Stakeholders
- Business Stakeholders
- Agile practitioners or Scrum Masters

Workshop Topics

The following topics may be covered during the workshop and assessment sessions:

- Review of existing AWS environment or existing on-premise platform
- Automation of repetitive tasks such as testing, deployment, and monitoring to reduce errors and increase efficiency.
- How organizations empower existing processes and platforms through AWS Services and integrations
- Managing and provisioning infrastructure as code (IaC), which allows for consistent and repeatable setups
- Agile/Scrum methodologies to plan and manage projects, enabling delivery of incremental improvements
- Continuously practices to detect issues early and maintain performance.
- Integrating security practices into the DevOps process

Key Workshop Outputs

Gain immediate value and insight through the following key outputs of the workshop:

- Business alignment of high-level goal and objective with modern modernization patterns and approaches
- Recommendations and analysis, enabling in a deeper understanding of current DevOps maturity and areas for improvement.
- Recommendations to adherence to DevOps principles, Best Practices and iterative enhancements of your DevOps Process
- High-level tool chain review and recommendations
- Strategic roadmap outlining the steps, timelines, and effort required for improvement.

Benefits of Workshop

Presidio's DevOps Platform Workshop will provide customers with the following benefits:

- An understanding of current state of AWS services and integrations, application development standards, infrastructure operations, application portfolio, workflows, tools, skills, organizational structure and overall vision.
- Education on AWS and DevOps best practices (infrastructure as code/configuration management, CI/CD, networking, and monitoring)
- Approach to continuing improvement towards a DevOps culture and mindset and tool chain
- Identify gaps and opportunities to heighten DevOps maturity and AWS environmental maturity
