PRESIDIO®

Cloud Strategy – Cloud Strategy & Maturity

Presidio's Cloud Strategy & Maturity Workshop helps organizations develop a comprehensive approach to cloud transformation by assessing current capabilities, defining target state, and creating a roadmap for successful cloud adoption.

Presidio will collaborate with client resources to assess current cloud maturity, identify strategic opportunities, and develop a comprehensive roadmap for cloud transformation. Activities consist of discovery and review sessions, capability assessment, and strategic planning activities

Who Should Participate

Presidio's Cloud Strategy team facilitates the workshop where direct customer participation is vital and expected.

Recommended Customer Attendees:

- CIO, CTO, and IT Leadership
- Enterprise Architects and IT Operations Managers
- Application Owners and Development Leaders
- Security and Compliance Officers
- Finance and Procurement Managers

Workshop Topics

The following topics will be covered during the workshop and assessment sessions:

- Cloud maturity assessment across key domains
- Current state analysis and capability mapping
- Target operating model development
- Technology strategy and architecture
- Cloud adoption framework alignment
- Security and governance model
- Organizational readiness assessment
- Skills and capabilities evaluation
- Innovation and modernization opportunities

Key Workshop Outputs

Gain immediate value and insight through the following outcomes of the workshop:

- Comprehensive cloud maturity assessment
- Target state architecture and operating model
- Strategic roadmap with clear milestones
- Governance and security framework
- Organizational change recommendations
- Technology adoption strategy
- Prioritized transformation initiatives

Benefits of Workshop

Presidio's Cloud Business Case Workshop will provide customers with the following benefits:

- Clear understanding of current cloud maturity
- Strategic alignment of cloud initiatives
- Prioritized modernization opportunities
- Risk mitigation strategies
- Industry best practices and benchmarks
