Prescriptive Landing Zone for Google Cloud

THE CHALLENGE

Organizations embracing the Google Cloud Platform (GCP) face the critical challenge of establishing a robust and scalable foundation that aligns with their unique business needs. This includes addressing complex design considerations related to compute, storage, data insights, high availability, and automation within a multi-cloud strategy. Without a well-defined landing zone, businesses risk inefficiencies, increased operational costs, and hindered innovation.

THE SOLUTION

Presidio's Prescriptive Landing Zone (PLZ) solution for Google Cloud accelerates your GCP environment's design, deployment, and optimization. Leveraging our deep expertise in multi-cloud strategies, we provide tailored blueprints and automated deployment targets that address your specific requirements. Our offering encompasses a comprehensive approach, from foundational configurations to highly complex and customized solutions, ensuring your GCP environment is right-sized for success.

KEY BENEFITS

- ◆ **Accelerated GCP deployment:** Streamline the process of aligning, defining, and deploying your Google Cloud Landing Zone through our efficient and prescriptive methodology.
- ◆ **Tailored solutions for diverse needs:** Simplify solution mapping to fit specific use cases and workload applications at scale, ranging from entry-level configurations to complex enterprise deployments.
- ◆ **Structured flexibility:** Benefit from a structured yet flexible approach, whether deploying a foundational landing zone or developing a fully customized environment.
- ◆ **Optimized multi-cloud integration:** Utilize our expertise in Anthos to securely and flexibly integrate your GCP environment with on-premises infrastructure and other cloud platforms.
- ◆ **Enhanced financial operations (FinOps):** Maximize your return on investment in GCP through our bundled technical, financial, and business strategy resources, eliminating unnecessary operational costs and administrative burdens.
- ◆ **Expert contact center solutions:** Leverage our two decades of experience in contact center implementations to deploy Google Contact Center AI, reducing overhead and enhancing customer satisfaction.
- ◆ **Global professional services:** Access our global team of best-in-class data and analytics, AppDev, and integration resources to ensure on-time and on-budget delivery of your critical multi-cloud deployments.
- ◆ **Optimized Google Workspace:** Presidio is an official Google Workspace reseller that goes beyond resell. Our global staff of highly skilled technicians can design, deploy, manage, and foster the adoption of your Google Workspace environment.
- ◆ **Strategic partnership:** Benefit from Presidio's expertise in multi-cloud and our strong partnership with Google Cloud, ensuring you have the support needed to thrive in the modern, multi-cloud world.
